NAVIGATION LED LIGHTS

WORKING FOR QUALITY

Our products are developed and tested according to a well-detailed process, dedicated to quality control. We know that we are providing innovative and technical products that work reliably even under extreme conditions typical of sea life.

DESIGN & INTEGRATION

1

ACCURATE DESIGN

The harmonious shape of our navigation light, modern and classic at the same time, make it perfect for the highest quality marine market.

BLACK ALUMINIUM
Dimensions (mm): ø 110, h. 167

WHITE ALUMINIUM
Dimensions (mm): ø 110, h. 167

STAINLESS ALUMINIUM
Dimensions (mm): ø 110, h. 167

3

THREE FINISHES

The harmonious shape of our navigation light, modern and classic at the same time, make it perfect for the highest quality marine market.

2

VISIBLE QUALITY

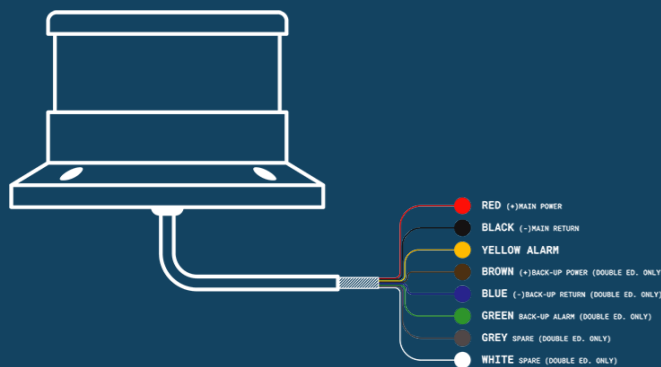

The navigation light is designed to work under the extreme conditions typical of sea life.

4

DURABLE

The highest quality standards are guaranteed by a double check of the manufacturing and testing processes.

ALL IN ONE

A REAL INNOVATION

Real innovation, because electronics is embedded and there is no need of additional devices to control it. The lights make a continuous self-diagnosis of its status to send all info of working or fault to the control panel.

MAIN FEATURES:

Self-diagnostic capabilities of the light

Less technical space in electrical panels than the systems until now in use

Easy installation
Wires have only to reach control board to collect all functions/alarm available

SECURITY NAVIGATION CONTROL SYSTEM

SECURITY IN NIGHT NAVIGATION

This system overcomes the problem of correct detection of the status of the light in the case of short circuit or decay of brightness.

4C Innovation LED Navigation Lights are able to send an alarm in two particularly cases:

- WHEN THERE IS A SHORT CIRCUIT
- WHEN THE LED LOSES BRIGHTNESS WITHOUT SHUTTING DOWN

So, at Golden Automation Systems, we have found a new way to ensure the security during night navigation.

Custom design for different screen sizes and ratios.

READY AND EASY TO INSTALL

- Without bracket
- Deck bracket
- Side bracket
